The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/888,920	Applicant(s) HOLMAN ET AL.	
	Examiner CATHERINE N. WITCZAK	Art Unit 3767	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/15/2008 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 47, 48, 49, 52, 53, and 59 are rejected under 35 U.S.C. 102(b) as being anticipated by Klumpp (US 2,724,736). Klumpp discloses in Figure 1 a catheter (C) comprising a flared proximal end (see Figure 3), a monolithic nylon hub (1) capable of receiving and retaining a catheter comprising a molded threaded proximal connector section, and a strain relief portion (2) molded with grooves extending orthogonally into the lumen in a helical fashion.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 3767

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 51 is rejected under 35 U.S.C. 103(a) as being unpatentable over Klumpp as modified by Wijkamp et al (US 5,167,647).

Klumpp discloses the claimed invention except for the hub being molded with wings. Wijkamp et al disclose in Figure 1 it is known to use wings molded to a hub. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system as taught by Klumpp with transverse wings as taught by Wijkamp et al, since such a modification would allow the patient to have a better grip of the hub.

Response to Arguments

Applicant argues that Klumpp's bushings is made of three parts; however, the main portion, which is considered the functional monolithic 'hub' portion (element 1 of Klumpp) meets all of Applicant's claim limitations. Furthermore, as to Applicant's arguments regarding the definitions of catheter and catheter hub, the terms refer broadly to tube-like devices and devices to which they are attached. Applicant has not provided any concise specific definitions of these terms, nor has Applicant provided limitations in the claims which would prevent the Examiner from using the reference of Klumpp as prior art as a 'catheter' and 'catheter hub' as defined in the instant case by the Applicant.
